

Thank you for viewing my screen print portfolio

This is only a small portion of work I have created over the last 33 + years. I like to be creative and challenge myself.

Thanks, Pete

**screen print** [skreen] [print]

a design is created on a mesh screen, and a stencil is created (often using light-sensitive emulsion) that defines the image areas. Ink is then applied and forced through the open mesh areas onto the material below, such as fabric, wood, or metal.
